Popup Exhibit Kits

Popup Exhibits + Community Events +
Facebook + YouTube

Popup Maker Kits work in two modes: as a museum exhibit, and as a portable popup ready to take to community events. Fairs, festivals, libraries, pubs and restaurants all become venues for museum community engagement. Components include: 1) engaging popup activities, 2) Storykiosk to record visitors' experience and creations, and 3) a series of post-visit at-home maker activities to extend the experience.

Popup Maker Kit: Illusion & Observation

- **Modular maker exhibits** that are quick to set up in museum program spaces or community spaces.
- **Traditional animation devices** such as the praxinoscope, phenakistoscope, and others provide an opportunity for visitors to try their hand at vintage animation. Devices designed and built by James Polk of Canstruct.
- **Followup activities** created by Paul Orselli (of POW!) are sent to visitors via email to extend their experience
- **Storykiosk Cloud Services** allows visitors to record their experiences, and provides the email and social media link to extend the experience

Popup Art Kit: PuppetShow

- **Art based activities** can be set up quickly in museum and community spaces such as festivals and other special events
- **Puppet-making** provides the initial theme – visitors create puppets related to the exhibit theme.
- **Followup activities** designed by artist/designer Amy Walsh engage visitors in art-making at home
- **Storykiosk** allows visitors to take a snapshot of what they made and talk about their experience.
- **Exhibit module** includes projected images of visitors' puppets on the wall for added impact

Custom Popup Kits

- Looking to extend your exhibit to community spaces outside the museum? We create custom popup kits that include: popup activities, storykiosk for recording experiences, and followup email activities to build the connection to the Museum after visitors return home.
